

Kopyttse (Серебряное Копытце) — Icon & Mascot Architecture

In Pavel Bazhov's 1938 Ural legend, every stamp of the little roe fawn's **Silver Hoof** sparks faceted green **Malachite & Chrysolite gems**—just as Seb Labs stamps noisy state into calibrated decision alpha.

01 • PRIMARY EMBLEM & MATHEMATICAL ANATOMY

The Kopyttse Decision Bust

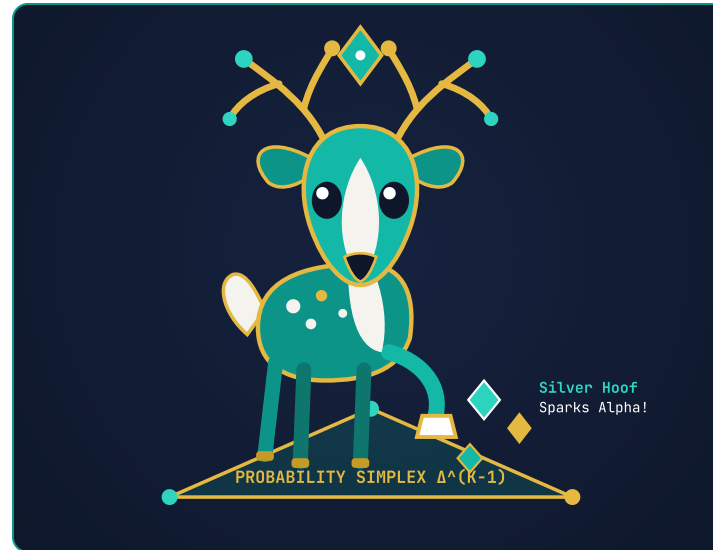

ASSET: `lab/assets/kopyttse\_icon.svg`

ZERO HARSH ANGLES

02 • FULL-BODY MASCOT POSE (FOR HEROES, DOCS & SLIDES)

Stamping the Silver Hoof on Δ^{K-1}

Full-body mascot saved at
lab/assets/kopyttse_mascot_full.svg—ready for website hero
animations, documentation callouts, and merchandise.

03 • MULTI-SCALE ICON & FAVICON SYSTEM

◆ LANDSCAPE AUDIT: 100% WHITESPACE

- **OpenAI / Anthropic / xAI:** Abstract monochrome swirls & slashes
- **Meta AI:** South American Llama • **DeepSeek:** Blue Whale
- **Mistral:** Retro Pixel `M` • **Sakana:** Red Origami Fish
- ★ **Seb Labs (Kopyttse):** The *only* Ural Silver-Hoof Fawn with DAG decision-tree antlers & a floating Malachite argmax gem.

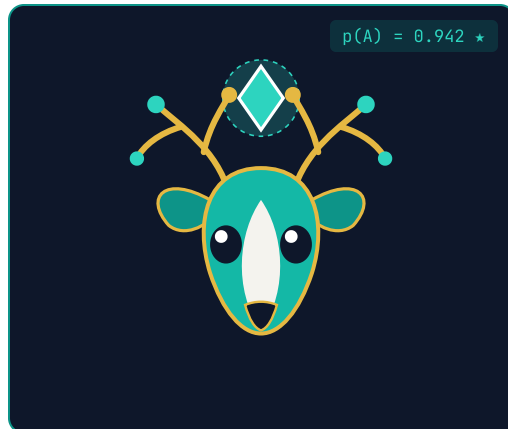

A Living Mascot That Visualizes *System-1 Telemetry*

Because *Kopyttse*'s antlers are a literal decision graph $G = (V, E)$ and its crown is the **argmax** gem, the mascot dynamically reflects model state across the UI.

STATE 01 • ARGMAX LOCK

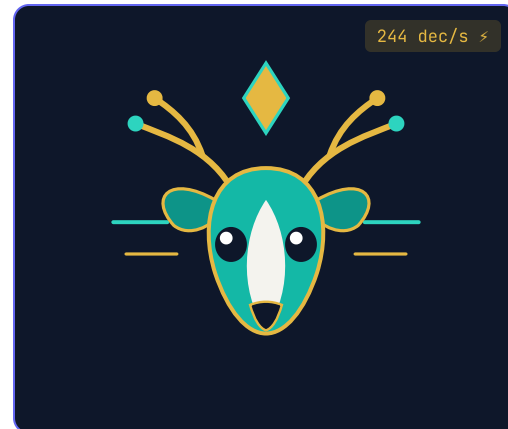

Calibrated Choice

Where used: Winning rows in benchmark tables, ``v1/systemone`` response cards, and Slide 01 Simplex core.

STATE 02 • NVFP4 REFLEX

21.7 ms Impulse

Where used: Latency timers, NVFP4 TensorRT-LLM throughput gauges, and robotics control loop indicators.

STATE 03 • CAUSAL GUARD

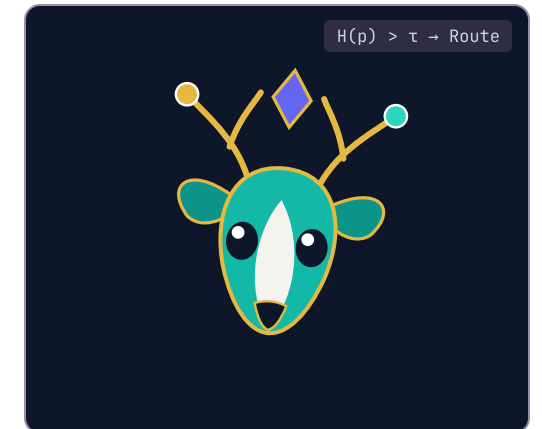

Zero-Leakage Fin

Where used: ``Seb-9B-Fin`` quantitative desk certificates, point-in-time backtest audits, and C2B exposure buckets.

STATE 04 • ESCALATION

System-2 Handoff

Where used: ``@seblabs/mcp`` confidence router when a query is near-tie (``p ≈ 0.50``) and escalated to Claude/GPT.
